

Glenrothes Area Local Community Plan Health & Wellbeing Profile

This profile presents information about the population living in the geographical area covered by the Glenrothes Area Local Community Plan and Glenrothes Local Area Committee.^a This area includes Glenrothes, Markinch, Leslie, Kinglassie, Thornton and Coaltown of Balgonie. This profile also presents information about the 20% of the population living in the most deprived areas and least deprived areas across Fife as shown on the map below.^b

This profile covers residents of all ages. It contains information on a range of factors that can positively and negatively affect the health and wellbeing of people living in the area. This profile gives a snapshot of selected health and wellbeing indicators using information available at September 2013.

Information in this profile can be used:-

- as an overview of health and wellbeing in the area
- to understand what this means in relation to Fife as a whole and in relation to the most and least deprived areas of Fife
- to support you in identifying any key health and wellbeing issues in the area
- to help you decide on local action that will improve the health and wellbeing of people living in the area and reduce health inequalities.

Fife's Health and Wellbeing Plan (www.healthyfife.net) provides further information on ways of working to reduce health inequalities and improve health and wellbeing.

The KnowFife Dataset (www.knowfife.fife.gov.uk) can provide other types of information about your area and other areas in Fife.

	Glenrothes Area		Most Deprived		Least Deprived		Fife		Explanatory Notes
Census Population	50,882		71,952		73,852		365,198		The total number of people living in each area at the 2011 Census. ¹
Population									Number and percentage of the population estimated to be in each age category in the 2011 mid-year population estimates. ²
Children	9,317 – 18.3%		14,344 - 20%		12,546 - 17%		64,997 – 18%		
Working age adults	31,106 – 61.3%		43,311 - 60%		47,834 - 63%		225,486 - 61%		
Pensionable age adults	10,348 – 20.4%		14,184 - 20%		15,021 - 20%		76,887 – 21%		
Births									Number of live hospital births to mothers aged 15-44 and rate per 1,000 female population aged 15-44 in 2011. ³
No:	584		1,146		702		4,268		
Rate per 1,000 population:	51.1		78.5		45		60.2		
Low birth weight babies									Number of singleton live births (all gestations) weighing less than 2,500 grams in 2011/12 as a percentage of all live singleton births. ³
No:	67*		83		29		223		
% of all single live births	6.1%*		7.6%		4.3%		5.5%		
Life Expectancy									Number of years of life expectancy for males and females born in 2009-2011. ⁴
Males	75.7		72.3		80.6		76.6		
Females	80.5		78.3		85.2		81.3		
Deaths									Deaths from all causes to residents of all ages and those aged under 75 years (premature death) in 2011; number and age standardised rate. ^{5,b}
No:	<u>All</u>	<u><75</u>	<u>All</u>	<u><75</u>	<u>All</u>	<u><75</u>	<u>All</u>	<u><75</u>	
ASR per 100,000 popn:	474	187	822	356	526	166	3,759	1,351	
	594	314	771	475	434	194	610	317	
Smoking									Self reported smoking amongst adults aged 16 and over in the Scottish Health Survey (SHeS) 2008-11. ⁶
% of adults:	22.8%*		40.8%		14.8%		26.4%		
Smoking in pregnancy									Self reported smoking at first ante-natal (booking) visit among expectant mothers in 2011/12. ³
% of expectant mothers:	26.2%		38%		7.2%		23.5%		
Breastfeeding									Babies being exclusively breastfed at 6-8 weeks after birth in 2011/12 shown as a percentage of all babies reviewed at 6-8 weeks. ⁷
% of all babies reviewed:	18.5%		15.4%		38.1%		26%		
Teenage Pregnancy									Number of pregnancies in women aged less than 16 years (at conception) in the three year period 2009-11 and rate per 1,000 female population aged 13-15. ⁸
No:	52*		56		11		169		
Rate per 1,000 population:	8.2*		13.8		3.0		9.0		
Child Weight									Children in Primary 1 categorised as overweight and obese based on height and weight measurements taken as part of child health reviews in 2011/12 shown as a percentage of all P1 children reviewed. ⁹
% overweight:	11%		11.7%		10.3%		11.4%		
% obese:	8.4%		11.7%		7.7%		9.9%		
Adult Weight									Adults aged 16 and over categorised as obese based on height and weight measurements taken during SHeS 2008-11. ⁶
% obese:	27%*		32.9%		27.9%		30.5%		
Physical Activity									Self reported participation in at least 30 minutes of physical activity on 5 or more days a week by adults aged 16 and over; SHeS 08-11. ⁶
% of adults:	39%*		36.2%		33.9%		37.1%		
Healthy Diet									Self reported consumption of 5 or more daily portions of fruit and vegetables by adults aged 16 and over in SHeS 08-11. ⁶
% of adults:	26%*		15.6%		34%		23.7%		
Alcohol Consumption	<u>Men</u>	<u>Women</u>	<u>Men</u>	<u>Women</u>	<u>Men</u>	<u>Women</u>	<u>Men</u>	<u>Women</u>	Self reported alcohol consumption beyond recommended levels of women 2-3 units a day or 14 units per week and men 3-4 units a day or 21 units per week; adults aged 16 and over SHeS 08-11. ⁶
Exceeds daily levels:	42%*	31%*	42%	32%	48%	38%	43%	33%	
Exceeds weekly levels:	27%*	18%*	29%	19%	28%	22%	28%	18%	
Mental Wellbeing									Average scores for positive mental wellbeing (measured by WEMWBS with scores ranging from min of 14 to max 70) and life satisfaction (ratings on a scale of 0 to 10 extremely satisfied). ⁶
WEMWBS Score	49.9*		47.8		51.1		49.9		
Life Satisfaction Score	7.7*		7.3		7.96		7.6

Multiple Admissions No: Rate per 1,000 population:	257 67.1		454 79.7		283 52.2		1,898 63.7		Number of residents aged 75 and over with two or more emergency admissions to hospital in 2011/12 and rate per 1,000 population aged 75 and over. ¹⁴

*Figures presented for wider Glenrothes and North East Fife area due to small numbers

Summary

The Glenrothes area has a population of 50,882 persons. Each of the seven areas has some of the most and least deprived populations within their boundaries.

During 2011 there were 584 births to residents living in the Glenrothes area, a lower rate of birth than the Fife average. The proportion of babies born with a low birth weight was higher than Fife and the proportion of babies being breastfed was lower. The rate of pregnancy in women aged under 16 years in the wider Glenrothes and North East Fife area was lower than Fife.

474 residents from the Glenrothes area died during 2011. The rate of death for all ages and premature deaths was lower in the Glenrothes area than across Fife. Rates of death from coronary heart disease for all ages and those aged under 75 years were similar in the Glenrothes area than in Fife. Cancer deaths were slightly higher in the Glenrothes area than Fife for all ages and premature deaths. New cases of cancer were higher in the Glenrothes area than Fife for all ages and among those under 75 years. Admissions to hospital with CHD were higher among the Glenrothes area residents than Fife as a whole.

A lower proportion of adults reported smoking in Glenrothes and North East Fife than Fife. Smoking among expectant mothers was higher in the Glenrothes area than Fife. The proportion of men and women drinking beyond sensible limits in Glenrothes and North East Fife was slightly lower or the same as Fife. Hospital admissions relating alcohol use were higher in the Glenrothes area than Fife but alcohol related deaths and admissions relating to drugs misuse were lower.

A lower proportion of P1 children were overweight and obese in the Glenrothes area than in Fife with levels of obesity in adults in Glenrothes and North East Fife also lower with more adults eating a healthy diet or undertaking the recommended level of exercise than in Fife as a whole. A similar proportion of the population in the Glenrothes area was registered with diabetes than across Fife.

Almost a quarter of children live in poverty with 24% in receipt of free school meals, both figures higher than reported for Fife. Average educational attainment by pupils in S4 in the Glenrothes area was lower than across Fife. The proportion of the Glenrothes area population in receipt of income and employment related benefits were higher than the Fife averages.

For indicators relating to hospital admissions, deaths, cancer registrations, income and employment, child health and education the Glenrothes area is better than the most deprived areas but worse than the least deprived areas.

- a. These areas have been defined from whole datazones.
 - b. Deprived areas are calculated from datazone populations which are ranked by SIMD and then divided into groups; each containing 20% of the Fife population.
 - c. ASR is age standardised rate. Age standardised rates are rates that have been adjusted to account for the different age structures of different populations and are often presented per 1,000 or 100,000 population. These are used to provide a more accurate comparison between different areas in Fife.
- * Where the number of cases (or sample size) was small figures have been shown for the wider Glenrothes and North East Fife area (based on Community Health Partnership area) to protect confidentiality and ensure robust estimates.

This profile gives a snapshot of selected health and wellbeing indicators using information available at September 2013.

Further Information

Profiles are available for each of the seven Area Committee/Local Plan areas. A technical report (including definitions of all indicators) is also available. Look in the Resources section of KnowFife (www.knowfife.fife.gov.uk) or on www.HealthyFife.net. Information for Area Committee/Local Plan areas can be found on KnowFife using Pick and Mix to select your area.
