KnowFifeDataset
Sharing research & knowledge across Fife Partnership

Monthly Bulletin
June 2015

The KnowFife Dataset email bulletin is an update and roundup of information relating to the KnowFife Dataset and other related information. The KnowFife Dataset provides access to a broad range of social, economic and health and wellbeing indicators for Fife Partnership organisations and other users in Fife. http://knowfife.fife.gov.uk

New Theme - Health & Social Care Integration

A new theme has been created in KnowFife Dataset covering Health & Social Care Integration. You can access this theme from the Quick Links section of the KnowFife Dataset home page. There are also links to key documents under Resources. At present this theme contains Profiles of each of the seven localities. Each profile contains key indicators for each locality compared to Fife and Scotland.

This new theme is a work in progress and we have plans to add new indicators and to enable comparison across all localities using thematic maps. We would welcome any comments you may have on what is currently available and future developments. In the meantime you can compare all or some of the localities on existing indicators by selecting area committees through data picker or thematic maps from the KnowFife dataset home page.

Data Update - Long term conditions

Data from the 2011 Census showing the number of long term conditions reported by Fife residents of all ages and aged 65 and over is now available for all of the geographies within KnowFife Dataset. You can access this data through Data Picker under Census 2011 Health & Care and via the Health and Social Care Integration Profile. Further age groups will be added over the next few weeks.

Infographics - Young People's Health and Wellbeing

A series of infographics on young people's health and wellbeing in Fife are now available in KnowFife Dataset Resources:

Young People's Health and Wellbeing

Young People's Health and Wellbeing Trends over time

Young People's Health and Wellbeing Differences between areas

Contact clare.campbell@nhs.net for more information.

ScotPHO Community Health Profiles

2015 Community Health and Wellbeing profiles are now available for Fife and for neighbourhoods within Fife (interzone level) from the Scottish Public Health Observatory (ScotPHO) http://www.scotpho.org.uk/comparative-health/profiles/online-profiles-tool

Local profiles have been grouped by area committee and can now be accessed through KnowFife Dataset Resources, Health and Wellbeing, ScotPHO Health and Well-being profiles, or through the relevant link below:

ScotPHO Health and Wellbeing Profile South West Fife

ScotPHO Health and Wellbeing Profile City of Dunfermline

ScotPHO Health and Wellbeing Profile Cowdenbeath

ScotPHO Health and Wellbeing Profile Kirkcaldy

ScotPHO Health and Wellbeing Profile Glenrothes

ScotPHO Health and Wellbeing Profile Levenmouth

ScotPHO Health and Wellbeing Profile North East Fife

ScotPHO – the Scottish Public Health Observatory - are currently looking at the feasibility of including mental health indicators in their 2016 Community Health profiles. The proposed indicators are as follows:

Children and young people	Adults
Overall mean mental wellbeing score	Mean mental wellbeing score
Pro-social behaviour mean score	Mean life satisfaction score
Emotional symptoms mean score	Common mental health problems (% >=4 on GHQ12)
Peer problems (=emotional problems) score	Alcohol dependency (%>=2 on CAGE , above threshold on AUDIT)
Conduct problems score	
Hyperactivity score	

Contact clare.campbell@nhs.net for more information.

Understanding Scottish Places

A new resource has been made available for profiling Scotland's towns: http://www.usp.scot/

Understanding Scottish Places visualises how different towns across Scotland inter-relate and how they depend on others around them for different services and functions.

Much of the information in the tool comes from 2011 Census.

If you want to pull out similar information for areas that are too small to appear in the towns profile, or understand how areas might differ within Fife's larger towns, then use the Census or Economic Update profiles from the KnowFife Dataset.

 Contact know.fife@fife.gov.uk for more information

Scottish Open Data Platform

Scottish Neighbourhood Statistics is changing. A new 'open data publishing platform' is being developed to make data accessible and re-usable. A test version of the site is available at http://statisticsbeta.com

To give your feedback on the test version of the new site, or to register interest in attending a Fife event in the Autumn to showcase the functionality of the new Open Data Platform please contact coryn.barclay@fife.gov.uk

Scottish Index of Multiple Deprivation

The next full SIMD - SIMD 2016 - will be produced in May 2016, and will be the first full index based on 2011 datazones. More information is available in the SIMD newsletter May 2015
Local Fife analysis of SIMD is available at www.fifedirect.org.uk/deprivation
Contact coryn.barclay@fife.gov.uk for more information.

Scotland's Census 2011 User Satisfaction Survey

The National Records of Scotland are looking for views about Scotland's Census 2011: what worked well, if you found it easy to access Census data, and what could be better?

Your views and input are needed to help them consider their activity in relation to Scotland's Census 2011 and inform their planning for the next census in 2021.

Specifically, they are interested in:

- your use of census outputs and products
- how well you felt that the outputs were publicised
- the accessibility of the outputs and other information on Scotland's Census website
- your overall satisfaction with the outputs
- suggestions you have for future outputs and their dissemination

Click here to take part in the consultation
